Subject: Appropriations Question

Hi Rudy,

Thank you for stopping by the office the other day; it was great to meet you in person.

Sen. Sanders' environmental team had a question about one of the Senator's EPA appropriations requests. As you know, Bennington, VT has discovered PFOA in their water. We would like to ensure that the program that oversees clean-up is fully funded. Can you tell me the appropriations account and program that manages clean-ups such as this? Considering the light that has been shed on contaminated drinking water sources in recent months, we are wondering if the President's request is still appropriate. Can you direct me to someone with that information?

Also, changing gears slightly, will the EPA play a role in the non-nuclear hazardous waste clean-up at Vermont Yankee?

Thank you for your help,

Emily Rampone
